Now and over the coming decades, human societies face daunting environmental challenges. Energy consumption is expected to rise sharply while even present-day carbon emissions intensify global warming, threatening the finely balanced marine and terrestrial ecosystems upon which we rely for food, water and shelter. Global population pressure and sea-level rise, along with weather extremes, will create climate refugees and resource conflicts on an unprecedented scale. Responding to these cascading environmental, socioeconomic, and political challenges will require all the creativity, expertise and compassion we can muster, but neither scientific arguments nor social appeals have succeeded in mobilizing adequate action. We must find rational, holistic and ethically grounded ways to focus intellectual attention on the human-nature nexus. This is an essential endeavor of the field of Environmental Studies (ENVS).

Guided by a commitment to addressing challenges on multiple scales—by a holistic vision of humans in the environment, and by the particular problem at hand—ENVS scholars, educators and activists utilize a variety of methods and tools, which are represented in college curricula in many different ways. Students have the opportunity to pursue a Major in Environmental Studies through a curricular collaboration between Haverford and Bryn Mawr Colleges, or pursue a Minor in Environmental Studies to complement another major. The ENVS department is dedicated to preparing students who have the environmental expertise needed for the world they will inherit.

The Bi-College ENVS major combines the strengths of our two liberal arts campuses to create an interdisciplinary program that teaches students to synthesize diverse disciplinary knowledge and approaches, and to communicate effectively across disciplinary boundaries as they engage with environmental issues. In addressing these issues, ENVS students will apply critical thinking and analytical skills within a holistic, systems framework that includes social justice as an essential component.

The ENVS introductory course offers in-depth investigation of the theoretical and applied foundations of the study of the environment from all divisions. The major incorporates praxis community-based learning and core courses that examine the theoretical and empirical approaches that the natural sciences, social sciences, arts and humanities bring to local and global environmental questions. In addition, ENVS majors pursue an individually selected area of environmental expertise, a focus area, in order to gain a depth of knowledge, and to develop a sense of their own agency in addressing what most concerns them. To support these learning goals, the ENVS program provides opportunities for independent and collaborative research, including co-curricular learning, via local, national and international internships and opportunities to study abroad.

Haverford, Bryn Mawr, and Swarthmore also offer an interdisciplinary Tri-College ENVS minor, involving departments and faculty on all three campuses from the natural sciences, engineering, mathematics, the humanities, and the arts. The Tri-Co ENVS minor brings together students and faculty to explore interactions among earth systems, human societies, and local and global environments.

Both the Bi-Co ENVS major and the Tri-Co ENVS minor cultivate in students the capacity to identify and confront key environmental issues through a blend of multiple disciplines, encompassing historical, cultural, economic, political, scientific, and ethical modes of inquiry.

To declare the ENVS major or minor, students should contact the Environmental Studies chair or advisor at their home campus.

Learning Goals

The Bi-Co Environmental Studies major is an interdisciplinary program that teaches students to synthesize diverse disciplinary knowledge and approaches, and to communicate effectively across disciplinary boundaries as they engage with environmental issues. Students graduating with the ENVS major are adept at applying diverse modes of analysis to solve problems across a wide array of interconnected social and environmental challenges.

Environmental Studies students apply critical thinking and analytical skills within a holistic, systems framework that includes the following specific goals:

• Cultivation of environmental literacies, and the ability to read, analyze, and create products from the environmental social sciences, natural sciences, and humanities
• Experience with praxis activities in the context of intellectual work, with particular emphasis on experience working with community groups in a socially just and participatory framework
• Development and refining of written and oral communication skills for a variety of academic and non-academic audiences
• Knowledge of, and the ability to articulate, the role of different divisions of intellectual inquiry in environmental issues
• An understanding of the diverse modes of environmental theory, and experience translating complex environmental data into actionable conclusions or revised theory.

Haverford’s Institutional Learning Goals are available on the President’s website, at http://hav.to/learninggoals.

Curriculum
There are two curricular pathways through Environmental Studies: the ENVS major and ENVS minor.

ENVS Major (Bi-Co)
The ENVS major curriculum is designed to maintain a balance between cultivating broad environmental literacies and developing a focused area of expertise with associated skills. This program includes core classes and a self-designed “focus area” that can be completed with coursework from Haverford, Bryn Mawr, and Swarthmore.

ENVS Minor (Tri-Co)
The ENVS minor curriculum is designed to complement any major at Haverford, Bryn Mawr or Swarthmore, pending approval of the student’s coursework plan by the home department and the ENVS chair.

Up to date information about the Environmental Studies department’s activities can be found at the departmental website.

Major Requirements
Students are required to take a minimum of 11 courses in the Environmental Studies major.

I. Core courses (6 credits)
Six required courses are in the core program, which consists of:
• ENVS H101 or ENVS B101 or ENVS S001: Case Studies in Environmental Issues
• ENVS H201 or ENVS B201: Laboratory in Environmental Sciences
• ENVS H202 or ENVS B202: Environment and Society
• ENVS H203 or ENVS B203: Environmental Humanities
• ENVS H204 or ENVS B204: Environmental Studies Praxis
• ENVS H397 or ENVS B397 or ENVS S091: Environmental Studies Senior Capstone (during the fall or spring semester of the senior year)

Students interested in pursuing an ENVS major are strongly encouraged to take ENVS 101 during their first year of study.

ENVS 101 and 397 are each offered two times per year: once at Haverford and once at Bryn Mawr, frequently in alternate semesters. Students are welcome to take these courses on either campus.

II. Electives and focus area (5 credits)
In addition to the core courses, ENVS majors must complete five electives. A wide variety of environmentally themed courses may serve as ENVS electives, including many courses offered by other departments and programs. Each student's set of elective courses must fulfill the following requirements:

• A minimum of one course must come from each of two broad divisional groups:
  • Natural sciences, mathematics, and engineering;
  • Social sciences, humanities, and arts.
• At least two elective courses must be taken at the 300-level or equivalent.
• At least three elective courses must articulate a coherent intellectual or thematic focus (a “focus area”) that students develop in consultation with their ENVS advisor;

III. Focus area
The possibilities of a focus area are many. A student’s focus area may be organized by a specific perspective on the study of the environment, a particular interdisciplinary focus, or even a geographic region. Focus areas are designated in consultation with an ENVS advisor. Early planning for the ENVS major allows students to begin satisfying prerequisites for advanced focus area courses.

Sample focus area topics include, but are not limited to: Environment and Society, Environmental Policy, Earth Systems, Environmental Modeling, Environmental Art and Technology, and Environment in East Asia.

Courses taken as ENVS major electives need not be prefixed with “ENVS” in the course catalog. Advanced courses with appropriate thematic content offered by any program, from Africana Studies, through Mathematics, to Visual Studies, may be counted.

Upon declaration of the ENVS major, the coursework plan must be approved by a major advisor on the student’s home campus. Courses approved for the
Environmental Studies major at Swarthmore can be taken for the Bi-Co ENVS major or substituted for requirements contingent upon the major advisor’s approval.

Courses taken while studying abroad or off-campus may be approved for the ENVS major by the major advisor in consultation with the Bi-Co ENVS Department faculty.

**Senior Project**

Students majoring in Environmental Studies will pursue their capstone experience in any one of a number of ways, centered within the one-semester ENVS H397 or ENVS B397 course. In this course, students will design and complete a project under the supervision of a faculty member that builds upon methods learned in the ENVS 200-level sequence and elaborated on during the Focus Area. In most cases, ENVS 397 will involve collaborating with one or more outside organizations or groups, and senior projects will be an individual project designed in concert with the faculty member and these organizations. For example, senior projects could include, but are not limited to, digital mapping and annotation of green space, the design and implementation of an environmental education curricular module, or an environmental art project. Students are strongly encouraged to consider possible senior project topics or techniques they would like to use prior to their senior year, and to be in dialogue with their faculty advisors about possible senior projects during the third year of study.

**Senior Project Learning Goals**

- **Collaboration with others, including students, faculty and staff, and outside partners**
  Each senior is expected to hone the skills required to collaborate in an effective fashion throughout the course of the senior project. These skills are likely to include working effectively outside of the campus space.

- **Application of techniques and methods acquired during the major sequence**
  The senior project is an opportunity for each student to demonstrate and apply the skills that are acquired during the ENVS major sequence, from research skills to communication skills. Students are expected to bring their unique strengths, approaches, and prior coursework to bear on the senior project.

- **Independent knowledge and responsibility**
  Each senior is responsible for their share of the project, even if it is part of a larger, team-based, collaborative effort. Students will demonstrate responsibility in the design and implementation of the project, in conversation with the faculty advisor and outside voices. Careful planning and consistent work effort are essential to completing a senior project.

- **Ethical practices for campus and community-oriented work**
  Students will build upon the knowledge acquired during the ENVS 200-level sequence to collaborate with on- and off-campus partners in an ethical and responsible way. This includes practicing ethical scholarship, sharing work effectively, and collaborating.

- **Creativity in approaches to major questions**
  Students will address the central topic of their senior project in creative and original ways. This should include some element of creative risk or ambition, which is encouraged and supervised by the ENVS faculty.

**Senior Project Assessment**

At the conclusion of a Senior Project, students will be expected to present their final project in an oral form to their peers and faculty from the ENVS department. In addition, each student will also be expected to submit a written form of the final project that documents their project and reflects on the experience. The faculty member supervising ENVS H397 will evaluate student work based on the quality and effort brought to bear during the project, and will assign a final numerical grade for the Senior Project. This faculty member may consult with other members of the ENVS department to provide feedback to individual students prior to Commencement.

**Minor Requirements**

The Tri-Co ENVS minor consists of six courses, including an introductory course. Students may complete the introductory course at any of the three campuses. The six required courses are:

- A required introductory course to be taken prior to the senior year. This may be ENVS H101 at Haverford or ENVS B101 at Bryn Mawr or the parallel course at Swarthmore (ENVS S001). Any one of these courses satisfies the requirement, and students may take no more than one such course for credit toward the minor.

- Four elective course credits from approved lists of core and cognate courses, including two credits in each of the following two categories. Students may use no more than one cognate course credit for each category. (See the ENVS website for course lists and more about core and cognate courses.) No more than one of these four course credits may be in the student’s major.

- **Environmental Science, Engineering, and Math:** courses that build understanding and knowledge of scientific methods and
theories, and explore how these can be applied in identifying and addressing environmental challenges. At least one of the courses in this category must have a laboratory component.

- **Environmental Social Sciences, Humanities, and Arts**: courses that build understanding and knowledge of social and political structures as well as ethical considerations, and how these inform our individual and collective responses to environmental challenges.

- An advanced elective in Environmental Studies (300-level, or its equivalent at Swarthmore) that can be from either category.

Haverford students interested in the ENVS minor should plan their course schedule with the ENVS Chair in consultation with their major advisor. In choosing electives, students should aim to include mostly intermediate or advanced courses.

**Affiliated Programs**

For information about faculty and courses in Environmental Studies at Swarthmore, visit the website of that program.

**Concentrations and Interdisciplinary Minors**

Environmental Studies contributes to the following concentrations and interdisciplinary minors:

- Health Studies
- Peace, Justice, and Human Rights
- Visual Studies

**Study Abroad**

The Bi-Co ENVS Department strongly encourages students to study abroad if it fits with their career plans. Students planning to major or minor in ENVS may receive course credit by participation in programs which offer environmental content, including but not limited to programs in Australia, Costa Rica, Denmark, Ecuador, Germany, Iceland, Scotland and South Africa.

Students may receive course credit for elective courses, at the equivalent of the 200 level or above, that contribute to the major’s “focus area” or the four non-core classes in the ENVS minor. Students majoring in ENVS are required to take ENVS 101 and ENVS 397 at Haverford or Bryn Mawr, or the equivalent courses at Swarthmore and strongly recommended to take the four 200-level core courses within the Bi-Co.

**Environmental Studies Faculty at Haverford**

**David Backus**
Visiting Professor

**Joanne Douglas**
Visiting Instructor of Environmental Studies

**Joshua Moses**
Associate Professor of Anthropology and Environmental Studies; Visual Culture, Arts, and Media Faculty Fellow (2020-2022)

**Helen White**
The William H. and Johanna A. Harris Professor in Environmental Studies and Chemistry; Associate Provost for Curricular Development & Research; Professor of Chemistry and Environmental Studies

**Jonathan Wilson**
Associate Professor and Chair of Environmental Studies

**Talia Young**
Visiting Assistant Professor of Environmental Studies

**Environmental Studies Faculty at Bryn Mawr**

**Don Barber**
Associate Professor of Environmental Studies and Geology, on the Harold Alderfer Chair in Environmental Studies

**Sara Grossman**
Assistant Professor of Environmental Studies on the Johanna Alderfer Harris and William H. Harris Professorship in Environmental Studies

**Carol Hager**
Professor of Environmental Studies and Political Science

**Jennifer S. Walker**
Visiting Assistant Professor of Environmental Studies

**Affiliated Faculty at Haverford**

**Craig Borowiak**
Professor of Political Science

**Thomas Donahue**
Visiting Assistant Professor of Political Science

**C. Stephen Finley**
Professor of English

**Benjamin Le**
Associate Provost for Faculty Development; Professor of Psychology

**Graciela Michelotti**
Environmental Studies (Bi-Co)

Associate Professor of Spanish

Robert C. Scarrow
Professor of Chemistry

Erin Schoneveld
Associate Professor of East Asian Languages and
Cultures and Visual Studies

Kristen Whalen
Assistant Professor of Biology

Affiliated Faculty at Bryn Mawr

Victor Donnay
Professor of Mathematics on the William R. Kenan, Jr.
Chair

Robert Dostal
Rufus M. Jones Professor and Chair of Philosophy

Jonas Goldsmith
Associate Professor of Chemistry

Yonglin Jiang
Associate Professor of East Asian Languages and
Cultures

Shiamin Kwa
Assistant Professor of East Asian Languages and
Cultures

Gary McDonogh
Helen Herrmann Chair and Professor of Growth and
Structure of Cities

Tom Mozdzer
Assistant Professor of Biology

Sydne Record
Assistant Professor of Biology

Nathan Wright
Chair and Associate Professor of Sociology

Program Committee at Swarthmore

Susan Barton
Visiting Assistant Professor of Environmental Studies

Adrienne Benally
Assistant Professor of Environmental Studies

Betsy Bolton
Alexander Griswold Cummins Professor of English

Timothy Burke
Professor of History

Giovanna Di Chiro
Professor of Environmental Studies

Joshua Ellow
Counselor and Educator

Carr Everbach
The Isaiah V. Williamson Professorship of Civil and
Mechanical Engineering; Environmental Studies

Christopher Graves
Associate Professor of Synthetic Inorganic Chemistry
and Environmental Studies

Jake Grossman
Visiting Assistant Professor of Ecology

Eric Jensen
Professor of Astronomy and Chair, Division of Natural
Sciences and Engineering

José-Luis Machado
Associate Professor of Ecology

James Padilioni
Visiting Assistant Professor of Religion

Jennifer Peck
Associate Professor of Economics and Environmental
Studies

Jennifer Pfluger
Assistant Professor of Environmental Studies and
Biology

Christy Schuetze
Associate Professor of Anthropology

Mark Wallace
Professor of Religion

Courses at Haverford

Africana Studies Courses

AFST H136  BLACK ECOLOGIES  (1.0 Credit)

Tajah Ebram
This course engages writings and cultural works
about Black eco-literary and ecological traditions. Black Ecologies focuses on the multiple ecological
and spatial conditions that have over-determined Black life and relationships to nature including the
middle passage, slavery, racial segregation, food apartheid, gentrification and even incarceration. All
these phenomena have produced unequal access to natural resources, space, food and land through
systems that racialize, gender and commodify space. By exploring Black cultural and land based worker’s
literary, cultural, and community responses to anti-Black environmental conditions, we will consider how
Black communities reclaim spatial autonomy through creative modes of collective liberation. Student’s
critical and creative writing will be based on course texts and outdoor experiences of observation and
laboring collectively at Haverfarm. Open only to first-year students as assigned by the Director of College
Writing. Crosslisted: AFST,ENVS.
Anthropology Courses

ANTH H281 INTRODUCTION TO ENVIRONMENTAL ANTHROPOLOGY (1.0 Credit)
Division: Social Science
Domain(s): B: Analysis of the Social World
An introduction to the ideas and methods central to environmental anthropology. Topics covered will include political ecology, crises and uncertainty, indigeneity and community management.

ANTH H302 OIL, CULTURE, POWER (1.0 Credit)
Zainab Saleh
Division: Social Science
Domain(s): B: Analysis of the Social World
This course will examine the political, social, and cultural history of oil. As the single most important commodity in the world, the story of control over this highly prized resource is a complex and violent one. It will discuss the ways in which oil has defined the fates of empires and nation-states, the rise and fall of local political movements, violence, neoliberal governmentality, and knowledge production. Prerequisite(s): One 100-level course in anthropology, political science, sociology, or history, or instructor consent
(Offered: Spring 2023)

Biology Courses

BIOL H326 BIOCHEMICAL ADAPTATIONS (0.5 Credit)
Kristen Whalen
Division: Natural Science
Domain(s): C: Physical and Natural Processes
This course will cover the diversity of physiological mechanisms and biochemical strategies that help organisms, from microbes to mammals, adapt to various environmental conditions. Emphasis put on biochemical evolution in response to changing environmental conditions. Crosslisted: Biology, Environmental Studies Prerequisite(s): BIOL H200A and B with a grade of 2.0 or above, or instructor consent

BIOL H456 ADVANCED TOPICS IN BIOLOGY OF MARINE LIFE (0.5 Credit)
Kristen Whalen
Division: Natural Science
Exploration of marine metazoan evolution through the lens of behavioral, morphological, biochemical, and physiological adaptations to various ocean regimes. Readings from primary literature will cover physio-chemical properties of seawater, abiotic/biotic organismal interactions, symbiosis, energy production, human impacts, and phylogenetic relationships. Crosslisted: Biology, Environmental Studies Prerequisite(s): BIOL H300 and BIOL H301 with a grade of 2.0 or above, or instructor consent

Chemistry Courses

CHEM H358 TOPICS IN ENVIRONMENTAL CHEMISTRY: HEAVY METALS IN OUR ENVIRONMENT, TOPICS IN ENVIRONMENTAL CHEMISTRY: TOXIC HEAVY METALS (0.5 Credit)
Robert Scarrow
Division: Natural Science
Domain(s): C: Physical and Natural Processes
Three lectures for one-half semester (one-half course credit). This course will examine chemical processes that occur in natural waters, soils and the atmosphere. Specific topics will be chosen with input from enrolled students, who will be expected to share in discussion leadership. Prerequisite(s): CHEM H222 (or other organic chemistry course such as CHEM B211), This course will examine chemical processes that occur in natural waters, soils and the atmosphere. Specific topics will be chosen with input from enrolled students, who will be expected to share in discussion leadership. CHEM 358 may be repeated once for credit as long as the topical themes differ. Crosslisted: Chemistry, Environmental Studies Prerequisite(s): CHEM H222 (or other organic chemistry course such as CHEM B211)
(Offered: Fall 2022)

English Courses

ENGL H304 DREAMING THE MEDIEVAL LANDSCAPE (1.0 Credit)
Danielle Allor
Division: Humanities
Domain(s): A: Meaning, Interpretation (Texts); B: Analysis of the Social World
This course enters the imagined landscapes of the medieval period through one of its most popular genres: the dream vision. We'll explore visions of strange forests, mystical gardens, glass temples, and jeweled cities; visions that offer potential for divine insight into the natural order of the universe but also possess surprising specificity in their plant, animal, and inanimate inhabitants. In addition to literary texts, we'll read selections from medieval natural philosophy and contemporary ecocritical theory. Lottery Preference: English majors by seniority
(Offered: Fall 2022)

ENGL H356 STUDIES IN AMERICAN ENVIRONMENT AND PLACE (1.0 Credit)
Stephen Finley
Division: Humanities
Texts mostly 19th and 20th-c. American, but beginning earlier, with colonial New England; then Thoreau, Maclean, Snyder, Dillard, Least Heat Moon, Ammons, Mary Oliver, E. O. Wilson. Topics: cultural production of landscape (rural and urban),
Environmental Studies Courses

ENVS H101 CASE STUDIES IN ENVIRONMENTAL ISSUES: CONCEPTS, CONTEXTS, & CONUNDRUMS (1.0 Credit)
Talia Young
Domain(s): A: Meaning, Interpretation (Texts); B: Analysis of the Social World; C: Physical and Natural Processes
The course offers a cross-disciplinary introduction to environmental studies. Tracing an arc from historical analysis to practical engagement, distinctive approaches to key categories of environmental inquiry are presented: political ecology, earth science, energy, economics, public health, ecological design, sustainability, policy, and environmental ethics. Basic concepts, such as thermodynamics, biodiversity, cost-benefit analysis, scale, modernization, enclosure, the commons, and situational ethics, are variously defined and employed within specific explorations of environmental challenges in the modern world. Prerequisite(s): Not open to students who have taken ENVS 101 at Bryn Mawr or Swarthmore (Offered: Fall 2022)

ENVS H118 PERSPECTIVES IN BIOLOGY: PLANTS AND PEOPLE (1.0 Credit)
Jonathan Wilson
Division: Natural Science
Domain(s): B: Analysis of the Social World; C: Physical and Natural Processes
A multidisciplinary approach to the co-evolution and co-domestication of plants and humans. Topics will include the biology, physiology, evolution, and cultivation of key plants, embedded within their social history and environmental effects. Intended for non-majors and meets in parallel with Biology 318. Crosslisted: Biology, Environmental Studies

ENVS H136 BLACK ECOLOGIES (1.0 Credit)
Tajah Ebram
This course engages writings and cultural works about Black eco-literary and ecological traditions. Black Ecologies focuses on the multiple ecological and spatial conditions that have over-determined Black life and relationships to nature including the middle passage, slavery, racial segregation, food apartheid, gentrification and even incarceration. All these phenomena have produced unequal access to natural resources, space, food and land through systems that racialize, gender and commodify space. By exploring Black cultural and land based worker's literary, cultural, and community responses to anti-Black environmental conditions, we will consider how Black communities reclaim spatial autonomy through creative modes of collective liberation. Student's critical and creative writing will be based on course texts and outdoor experiences of observation and laboring collectively at Haverfarm. Open only to first-year students as assigned by the Director of College Writing. Crosslisted: AFST,ENVS. (Offered: Spring 2023)

ENVS H201 ENVIRONMENTAL SCIENCE (1.0 Credit)
Jonathan Wilson
Division: Natural Science; Quantitative
Domain(s): C: Physical and Natural Processes
A survey of environmental science, focusing on key issues in the solid, living, and fluid Earth, using campus as a living lab. Exploration of analytical techniques, scientific knowledge production, application-oriented scientific reporting, and historical context for sites of study. Includes field-based research, long-term monitoring, analysis of multiple datasets, laboratory analysis, and communication of findings to diverse audiences, where appropriate. Prerequisite(s): ENVS 101 (Offered: Fall 2022)

ENVS H204 PLACE, PEOPLE AND COLLABORATIVE RESEARCH IN ENVIRONMENTAL STUDIES (1.0 Credit)
Joanne Douglas, Staff
Division: Social Science
Domain(s): A: Meaning, Interpretation (Texts); B: Analysis of the Social World
This course focuses on the ethics and practice of community collaboration and community based research in the context of environmental challenges. Students will gain grounding in both theory and practice incorporating themes related to race, class, gender and environmental justice. Students will complete 4-5 hours of fieldwork per week. Prerequisite(s): ENVS 101 and at least one of ENVS 201, 202, 203 or instructor's permission.

ENVS H281 INTRODUCTION TO ENVIRONMENTAL ANTHROPOLOGY (1.0 Credit)
Staff
Division: Social Science
Domain(s): B: Analysis of the Social World
An introduction to the ideas and methods central to environmental anthropology. Topics covered will include political ecology, crises and uncertainty, indigeneity and community management.

ENVS H281 INTRODUCTION TO ENVIRONMENTAL ANTHROPOLOGY (1.0 Credit)
Staff
Division: Social Science
Domain(s): B: Analysis of the Social World
An introduction to the ideas and methods central to environmental anthropology. Topics covered will include political ecology, crises and uncertainty, indigeneity and community management.

ENVS H318 ECONOMIC BOTANY (1.0 Credit)
Jonathan Wilson
Division: Natural Science
Domain(s): B: Analysis of the Social World; C: Physical and Natural Processes
A multidisciplinary approach to the coevolution and co-domestication of plants and humans. Topics will include the biology, physiology, evolution, and cultivation of key plants, embedded within their social history and environmental effects, and explored at an advanced level. Meets in parallel with Biology 118. Prerequisite(s): 200-level course in Anthropology, Biology, Chemistry, or Geology or ENVS H101 and permission of instructor. Crosslisted: Biology, Environmental Studies.

ENVS H326 BIOCHEMICAL ADAPTATIONS (0.5 Credit)
Kristen Whalen
Division: Natural Science
Domain(s): C: Physical and Natural Processes
This course will cover the diversity of physiological mechanisms and biochemical strategies that help organisms, from microbes to mammals, adapt to various environmental conditions. Emphasis put on biochemical evolution in response to changing environmental conditions. Crosslisted: Biology, Environmental Studies. Prerequisite(s): BIOL H200A and B with a grade of 2.0 or above, or instructor consent.

ENVS H328 BOTANY (1.0 Credit)
Jonathan Wilson
Division: Natural Science
Domain(s): C: Physical and Natural Processes
This course is a multidisciplinary approach to the biology of plants through their development, physiology, anatomy, and growth and their consequent effects on human society. Course topics include plant biology, anatomy, diversity, morphology, physiology, and ecology, followed by case studies of plants, from cacao to apples. Prerequisite(s): ENVS 101 and ENVS 201 or ENVS 101 and 200-level ENVS, GEO, BIO or ENVS 101 and permission of instructor. Lottery Preference: Senior ENVS majors, junior ENVS majors, then seniors, followed by all other students. This course is tied to a 360 or study tour, that section will be closed to further enrollment. (Offered: Fall 2022)

ENVS H350 ADV TOPIC ENVIRONMNTL STUDIES: FRACTALS TO THE FUTURE: PATTERNS IN MYTH, MEDIA, NATURE, COSMOS (1.0 Credit)
Division: Humanities
Domain(s): A: Creative Expression
This course engages students in the theory and investigation of ancient and emergent patterns in life and human nature through multiple field perspectives. In an urgent time of climate crisis and environmental injustice, this class centers the myths, visions and voices of black and indigenous peoples disproportionately impacted by climate change, and (un)natural disasters. Pre-requisite(s): Successful completion of one of ENVS 201, ENVS 202, ENVS 203, or ENVS 204; or permission of instructor and introductory coursework in Environmental Studies. Lottery Preference: Senior ENVS majors, then junior ENVS majors, then sophomore students who have completed the prerequisites.

ENVS H358 TOPICS IN ENVIRONMENTAL CHEMISTRY: TOXIC HEAVY METALS (0.5 Credit)
Robert Scarrow
Division: Natural Science
Domain(s): C: Physical and Natural Processes
This course will examine chemical processes that occur in natural waters, soils and the atmosphere. Specific topics will be chosen with input from enrolled students, who will be expected to share in discussion leadership. CHEM 358 may be repeated once for credit as long as the topical themes differ. Crosslisted: Chemistry, Environmental Studies. Prerequisite(s): CHEM H222 (or other organic chemistry course such as CHEM B211) (Offered: Fall 2022)

ENVS H397 SENIOR SEMINAR IN ENVIRONMENTAL STUDIES (1.0 Credit)
Division: A: Meaning, Interpretation (Texts); B: Analysis of the Social World; C: Physical and Natural Processes
This capstone Environmental Studies course is designed to allow Environmental Studies seniors to actively engage in environmental problem solving by bringing the perspectives and skills gained from their majors and applying them to collaborative, interdisciplinary projects. Enrollment Preference(s): Limited to seniors (Offered: Fall 2022, Spring 2023)

ENVS H456 ADVANCED TOPICS IN BIOLOGY OF MARINE LIFE (0.5 Credit)
Kristen Whalen
Division: Natural Science
Exploration of marine metazoan evolution through the lens of behavioral, morphological, biochemical, and physiological adaptations to various ocean regimes. Readings from primary literature will cover physio-chemical properties of seawater, abiotic/biotic organismal interactions, symbiosis, energy production, human impacts, and phylogenetic relationships. Crosslisted: Biology, Environmental Studies. Prerequisite(s): BIOL H300 and BIOL H301 with a grade of 2.0 or above, or instructor consent.

ENVS H480 INDEPENDENT STUDY (1.0 Credit)
Helen White, Jonathan Wilson, Staff
History Courses

HIST H253 THE HISTORY OF THE US BUILT ENVIRONMENT, 1870 TO THE PRESENT (1.0 Credit)
Andrew Friedman
Division: Social Science
Domain(s): A: Meaning, Interpretation (Texts); B: Analysis of the Social World
This course looks at the history of the U.S. through its built environment, or the physical spaces & landscapes through which Americans constructed their habits, hopes, and divisions. We will investigate how struggles over the U.S. polity came to be reflected in the built world. Topics include the creation of property, the building of the metropolis, the making of the suburbs, electrification and the highways, urban crisis, and the postindustrial landscape.
(Offered: Fall 2022)

Independent College Programs Courses

ICPR H112 GLOBAL SOLIDARITY AND LOCAL ACTIONS: INTERDEPENDENCE, SOCIAL CHANGE, AND HAVERFORD (1.0 Credit)
Nora Reynolds
Division: Social Science
Domain(s): B: Analysis of the Social World
This course embraces global interdependence while considering how individual identities relate to appropriate local civic actions. Participants review ideas and methods relevant for co-creating more just, inclusive, sustainable communities, advancing inquiry in dialogue with community-based partners of Haverford College.

Philosophy Courses

PHIL H218 ENVIRONMENTAL PHILOSOPHY (1.0 Credit)
Division: Humanities
Domain(s): A: Meaning, Interpretation (Texts)
In this course, we study various arguments in environmental ethics and environmental aesthetics in order to think more clearly about the value of living and non-living things. We do so through a close reading of contemporary and historical philosophical texts. Pre-requisite(s): One course in Philosophy or Environmental Studies 101

Writing Program Courses

WRPR H136 BLACK ECOLOGIES (1.0 Credit)
Tajah Ebram
This course engages writings and cultural works about Black eco-literary and ecological traditions. Black Ecologies focuses on the multiple ecological and spatial conditions that have over-determined Black life and relationships to nature including the middle passage, slavery, racial segregation, food apartheid, gentrification and even incarceration. All these phenomena have produced unequal access to natural resources, space, food and land through systems that racialize, gender and commodify space. By exploring Black cultural and land based worker’s literary, cultural, and community responses to anti-Black environmental conditions, we will consider how Black communities reclaim spatial autonomy through creative modes of collective liberation. Student’s critical and creative writing will be based on course texts and outdoor experiences of observation and laboring collectively at Haverfarm. Open only to first-year students as assigned by the Director of College Writing. Crosslisted: AFST,ENVS.
(Offered: Spring 2023)

Courses at Bryn Mawr

Anthropology Courses

ANTH B254 ANTHROPOLOGY AND SOCIAL SCIENCE RESEARCH METHODS (1.0 Credit)
Melissa Pashigian
Division: Humanities
This course is designed for students interested in learning ethnographic and qualitative social science methods, and how to analyze qualitative results. Through hands on fieldwork, students will learn and practice ethnographic field methods, for example, observation, participant observation, interviewing, use of visual media and drawing, life stories, generating and analyzing data, and ways to productively transform qualitative data into contextual information. Ethics in ethnographic research will be a central theme, as will envisioning and designing projects that protect human subjects. The purpose of this course is to provide anthropology majors and students in social sciences, humanities, as well as STEM majors with interests in multi-method research, an opportunity to learn methods in advance of their thesis proposal and research, Hanna Holborn Gray summer research, and other social science independent research opportunities during their undergraduate experience, and post-graduation.

Biology Courses

BIOL B210 BIOLOGY AND PUBLIC POLICY (1.0 Credit)
Division: Natural Science
Domain(s): C: Physical and Natural Processes
A lecture/discussion course on major issues and advances in biology and their implications for public policy decisions. Topics discussed include reproductive technologies, the Human Genome project, environmental health hazards, bioterrorism, and euthanasia and organ transplantation. Readings include scientific articles, public policy and ethical considerations, and lay publications. Lecture three
hours a week. This class involves considerable writing. Prerequisite: One semester of BIOL 110-111 or permission of instructor.

**BIOL B220 ECOLOGY (1.0 Credit)**  
**Joni Baumgarten**  
**Division:** Natural Science  
A study of the interactions between organisms and their environments. The scientific underpinnings of current environmental issues, with regard to human impacts, are also discussed. Students will also become familiar with ecological principles and with the methods ecologists use. Students will apply these principles through the design and implementation of experiments both in the laboratory and the field. Lecture three hours a week, laboratory/field investigation three hours a week. There will be optional field trips throughout the semester. Prerequisite: One semester of BIOL B110 or B111 or permission of instructor.  
*(Offered: Fall 2022)*

**BIOL B255 MICROBIOLOGY (1.0 Credit)**  
**Monica Chander**  
**Division:** Natural Science  
**Domain(s):** C: Physical and Natural Processes  
Invisible to the naked eye, microbes occupy every niche on the planet. This course will examine how microbes have become successful colonizers; review aspects of interactions between microbes, humans and the environment; and explore practical uses of microbes in industry, medicine and environmental management. The course will combine lecture, discussion of primary literature and student presentations. Three hours of lecture and three hours of laboratory per week. Prerequisites: BIOL 110 and CHEM B104.  
*(Offered: Spring 2023)*

**BIOL B262 URBAN ECOSYSTEMS (1.0 Credit)**  
**Staff**  
**Division:** Natural Science  
Cities can be considered ecosystems whose functions are highly influenced by human activity. This course will address many of the living and non-living components of urban ecosystems, as well as their unique processes. Using an approach focused on case studies, the course will explore the ecological and environmental problems that arise from urbanization, and also examine solutions that have been attempted. Prerequisite: BIOL B110 or B111 or ENVS B101.  
*(Offered: Spring 2023)*

**BIOL B332 GLOBAL CHANGE BIOLOGY (1.0 Credit)**  
**Thomas Mozdzer**  
Global changes to our environment present omnipresent environmental challenges. We are only beginning to understand the complex interactions between organisms and the rapidly changing environment. Students will explore the effects of global change on ecosystems by critically reading and analyzing the primary literature and the latest IPCC report. In 2021, there will be a mandatory one-day field trip to the Smithsonian Global Change Research Wetland. Prerequisites: BIOL B220, BIOL 225 or BIOL B262, or permission of instructor.

**Growth and Structure of Cities Courses**

**CITY B201 INTRODUCTION TO GIS FOR SOCIAL AND ENVIRONMENTAL ANALYSIS (1.0 Credit)**  
**Jennifer Hurley**  
**Domain(s):** B: Analysis of the Social World; C: Physical and Natural Processes  
This course is designed to introduce the foundations of GIS with emphasis on applications for social and environmental analysis. It deals with basic principles of GIS and its use in spatial analysis and information management. Ultimately, students will design and carry out research projects on topics of their own choosing. Prerequisite: At least sophomore standing and Quantitative Readiness are required (i.e.the quantitative readiness assessment or Quan B001).  
*(Offered: Fall 2022)*

**CITY B345 ADVANCED TOPICS IN ENVIRONMENT AND SOCIETY (1.0 Credit)**  
**Min Kyung Lee**  
This is a topics course. Topics vary.

**East Asian Languages and Cultures Courses**

**EALC B355 ANIMALS, VEGETABLES, MINERALS IN EAST ASIAN LITERATURE & FILM (1.0 Credit)**  
**Shiamin Kwa**  
This semester, we will explore how artists question, explore, celebrate, and critique the relationships between humans and the environment. Through a topics-focused course, students will examine the ways that narratives about environment have shaped the way that humans have defined themselves. We will be reading novels and short stories and viewing films that contest conventional binaries of man and animal, civilization and nature, tradition and technology, and even truth and fiction. “Animals, Vegetables, Minerals” does not follow chronological or geographical frameworks, but chooses texts that engage the three categories enumerated as the major themes of our course. We will read and discuss animal theory, theories of place and landscape, and theories of modernization or mechanization; and there will be frequent (and intentional) overlap between these categories. We will also be watching films that extend our
theoretical questions of these themes beyond national, linguistic, and generic borders. You are expected to view this course as a collaborative process in which you share responsibility for leading discussion. There are no prerequisites or language expectations, but students should have some basic knowledge of East Asian, especially Sinophone, history and culture, or be willing to do some additional reading (suggested by the instructor) to achieve an adequate contextual background for exploring these texts. (Offered: Spring 2023)

Economics Courses

ECON B225 ECONOMIC DEVELOPMENT (1.0 Credit)
Sebastian Anti
Division: Social Science
Domain(s): B: Analysis of the Social World
Examination of the issues related to and the policies designed to promote economic development in the developing economies of Africa, Asia, Latin America, and the Middle East. Focus is on why some developing economies grow faster than others and why some growth paths are more equitable, poverty reducing, and environmentally sustainable than others. Includes consideration of the impact of international trade and investment policy, macroeconomic policies (exchange rate, monetary and fiscal policy) and sector policies (industry, agriculture, education, population, and environment) on development outcomes in a wide range of political and institutional contexts. Prerequisite: ECON B105. (Offered: Spring 2023)

Environmental Studies Courses

ENVS B101 INTRODUCTION TO ENVIRONMENTAL STUDIES (1.0 Credit)
Carol Hager
The course offers a cross-disciplinary introduction to environmental studies. Tracing an arc from historical analysis to practical engagement, distinctive approaches to key categories of environmental inquiry are presented: political ecology, earth science, energy, economics, public health, ecological design, sustainability, public policy, and environmental ethics. Basic concepts, such as thermodynamics, biodiversity, cost-benefit analysis, scale, modernization, enclosure, the commons, and situational ethics, are variously defined and employed within specific explorations of environmental challenges in the modern world. No divisional credit is awarded for this course at Haverford nor does the course satisfy any of the Bryn Mawr approaches to inquiry. (Offered: Spring 2023)

ENVS B202 ENVIRONMENT AND SOCIETY (1.0 Credit)
Carol Hager
Division: Social Science
Domain(s): B: Analysis of the Social World
An exploration of the ways in which different cultural, economic, and political settings have shaped issue emergence and policy making. We examine the
politics of particular environmental issues in selected countries and regions, paying special attention to the impact of environmental movements. We also assess the prospects for international cooperation in addressing global environmental problems such as climate change. Pre-requisite ENVS B101 or ENVS H101 or instructor's permission.

(Offers: Spring 2023)

ENVS B203 ENVIRONMENTAL HUMANITIES: STORIES OF JUSTICE AND INJUSTICE (1.0 Credit)
Sara Grossman
Division: Humanities
Domain(s): A: Meaning, Interpretation (Texts)
Bringing the traditional focus of the humanities—questions of meaning, value, ethics, justice and the politics of knowledge production—into environmental domains calls for a radical reworking of a great deal of what we think we know about ourselves and our fields of inquiry. Inhabiting the difficult space of simultaneous critique and action, this course will re-imagine the proper questions and approaches of the humanities, asking how our accumulated knowledge and practice might be refashioned to meet current environmental challenges, to productively rethink ‘the human’ in more than human terms. In order to resituate the human within the environment, and to resituate nonhumans within cultural and ethical domains, we will draw on a range of texts and films, and engage in a range of critical and creative practices of our own. Critical Interpretation (CI); Cross-Cultural Analysis (CC). Writing in the major/Intensive. Prerequisite: ENVS H101 or B101. (Hard check prerequisite). Enrollment cap: 18. Lottery Preference(s): Senior ENVS majors, Junior ENVS majors, Sophomores, first-year students. Minors and non-majors by instructor’s permission.

(Offers: Fall 2022, Spring 2023)

ENVS B204 PLACE, PEOPLE AND PRAXIS IN ENVIRONMENTAL STUDIES (1.0 Credit)
Sara Grossman
Division: Social Science
Domain(s): A: Meaning, Interpretation (Texts); B: Analysis of the Social World
This course offers a cross-disciplinary introduction to community-based learning. Working with local community groups, students will learn the fundamental skills of praxis work applied to environmental issues within an inquiry-based framework. Pre-requisite: ENVS B101 or ENVS H101 and (ENVS B202, B203, or H203) or instructor’s permission.

(Offers: Fall 2022, Spring 2023)

ENVS B350 ADVANCED TOPICS IN ENVIRONMENTAL STUDIES (1.0 Credit)
Staff
This is a topics course. Course content varies.

(Offers: Fall 2022)

ENVS B397 SENIOR SEMINAR IN ENVIRONMENTAL STUDIES (1.0 Credit)
Sara Grossman
This capstone Environmental Studies course is designed to allow Environmental Studies seniors to actively engage in environmental problem solving. Students bring the perspectives and skills gained from their ENVS focus area and from their preparatory work in the major/minor to collaborate on interdisciplinary projects

Geology Courses

GEOL B101 HOW THE EARTH WORKS (1.0 Credit)
Arlo Weil, Katherine Marenco
Division: Natural Science
Domain(s): C: Physical and Natural Processes
An introduction to the study of planet Earth—the materials of which it is made, the forces that shape its surface and interior, the relationship of geological processes to people, and the application of geological knowledge to the search for useful materials. Laboratory and fieldwork focus on learning the tools for geological investigations and applying them to the local area and selected areas around the world. Three lectures and one afternoon of laboratory or fieldwork a week. One required one-day field trip on a weekend.

(Offers: Fall 2022)

GEOL B203 BIOSPHERE THROUGH TIME (1.0 Credit)
Katherine Marenco
Division: Natural Science
Domain(s): C: Physical and Natural Processes
We will explore how the Earth-life system has evolved through time by studying the interactions between life, climate, and tectonic processes. During the lab component of the course, we will study important fossil groups to better understand their paleoecology and roles in the Earth-life system.

Prerequisite: GEOL B101, GEOL B108, or GEOL B209.

(Offers: Fall 2022)

GEOL B206 ENERGY RESOURCES AND SUSTAINABILITY (1.0 Credit)
Staff
Division: Natural Science
An examination of issues concerning the supply of energy required by humanity. This includes an investigation of the geological framework that determines resource availability, aspects of energy production and resource development and the
science of global climate change. Two 90-minute lectures a week. Suggested preparation: one year of college science.

**GEOL B209 NATURAL HAZARDS (1.0 Credit)**
*Katherine Marenco*

**Division:** Natural Science  
**Domain(s):** C: Physical and Natural Processes

A quantitative approach to understanding the earth processes that impact human societies. We consider the past, current, and future hazards presented by geologic processes, including earthquakes, volcanoes, landslides, floods, and hurricanes. The course includes discussion of the social, economic, and policy contexts within which natural geologic processes become hazards. Case studies are drawn from contemporary and ancient societies. Lecture three hours a week.

**GEOL B302 LOW-TEMPERATURE GEOCHEMISTRY (1.0 Credit)**

**Division:** Natural Science  

Stable isotope geochemistry is one of the most important subfields of the Earth sciences for understanding environmental and climatic change. In this course, we will explore stable isotopic fundamentals and applications including important case studies from the recent and deep time dealing with important biotic events in the fossil record and major climate changes. Prerequisites: GEOL B101 or GEOL B108, and at least one semester of chemistry or physics, or permission of instructor.

**History Courses**

**HIST B212 PIRATES, TRAVELERS, AND NATURAL HISTORIANS: 1492-1750 (1.0 Credit)**
*Ignacio Gallup-Diaz*

**Division:** Social Science  

In the early modern period, conquistadors, missionaires, travelers, pirates, and natural historians wrote interesting texts in which they tried to integrate the New World into their existing frameworks of knowledge. This intellectual endeavor was an adjunct to the physical conquest of American space, and provides a framework through which we will explore the processes of imperial competition, state formation, and indigenous and African resistance to colonialism.

**Political Science Courses**

**POLS B256 GLOBAL POLITICS OF CLIMATE CHANGE (1.0 Credit)**
*Carol Hager*

This course will introduce students to important political issues raised by climate change locally, nationally, and internationally, paying particular attention to the global implications of actions at the national and subnational levels. It will focus not only on specific problems, but also on solutions; students will learn about some of the technological and policy innovations that are being developed worldwide in response to the challenges of climate change. Only open to students in 360 program.  
*(Offered: Fall 2022)*

**POLS B339 BUREAUCRACY & DEMOCRACY IN AMERICA (1.0 Credit)**
*Marissa Golden*

**Division:** Social Science  
**Domain(s):** B: Analysis of the Social World

This course is an upper-level seminar designed primarily for juniors and seniors who want to spend the Semester reading about and discussing the role of the federal bureaucracy in the U.S. political system. Topics will include the history
of the federal bureaucracy, the bureaucratic policymaking process & administrative law, the roles of expertise and politics in agency decision-making, the competition among the three constitutional branches to “control” the bureaucracy, and the normative goals of competence, responsiveness and representativeness. Discussion of current events - including the federal government’s response to COVID and the role of race in public administration - will be a central part of the seminar. Attention will also be paid – and assignments oriented towards - preparing students for the Senior Experience. 

(Offered: Spring 2023)
